Repair Café

Toss it? No way!

Working on your own Repair Café logo

Below is a step-by-step explanation on how you can – very easily – make a personalised logo for your Repair Café.

Before you begin

The logo templates are PDF documents. When working on an Apple computer, you can edit and save them using the Adobe Reader. On a PC this is not possible with Adobe, but can be done with the following PDF reader:

http://www.foxitsoftware.com/Secure_PDF_Reader/

Therefore, if you want to edit the logo documents on a PC, we advise you to download this reader using the above link.

Filling it in

1. From the folder 'Logo template documents' choose the document with the same number of characters as the name / place name of your Repair Café (including blank spaces).

2. Open the document in Acrobat Reader or similar program.

3. Click on the number and type in – in CAPITAL LETTERS – the name / place name of your Repair Café.

4. Save the document as a PDF document.

5. You now have a personalised logo document that is suitable for print.

Good luck!
